DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 21, 2008 has been entered.

The amendments to claims 1, 6, 10 and 12 have been acknowledged. Consequently, the objection to the drawings cited in the previous Office action has been withdrawn.

Allowable Subject Matter

Claims 1-6, 9-12, 14, 16, 18, 19 and 22 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art does not Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Ogura et al. (US 5,364,533) disclose a syringe-like device for isolating plasma from a blood sample. The device comprises a plunger 23b, a separation fleece 24 and a transport fleece 29 wherein the separation fleece 24 is selectively permeable to plasma and thus separates the plasma from rest of the blood sample. The plunger 23b applies pressure to facilitate the separation and the discharge of the plasma via outlet 28a.

However, the reference does not disclose that the actuation of the plunger detaches the separation fleece from the transport fleece. None of the prior art disclose a device comprising a plasma-selective fleece and a plunger wherein the fleece is configured to detach upon the actuation of a plunger.
